FILING DATE: June 29, 2001 EXAMINER: S. Bratlie
TITLE: Apparatus and Methods for Semiconductor Wafer Processing Equipment

RESPONSE

This paper is submitted in response to the pending Office action, Paper No. 7, mailed from the U.S. Patent and Trademark Office on March 12, 2003, for which the shortened statutory period was set to expire on June 12, 2003. Applicants hereby request a one month extension of time until July 12, 2003 and enclose a check for \$55.00 with the enclosed Petition. The extended deadline for response is automatically extended to Monday, July 14, 2003 under 37 CFR § 1.7. In the event that any additional fees are due, the Commissioner is hereby authorized to charge any such fees to Attorney's Deposit Account No. 20-0531. Please consider the following remarks.

REMARKS

Claims 1-17 are rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. Patent No. 6,013,920 to Gordon et al. (hereinafter "Gordon") in view of U.S. Patent No. 6,068,668 to Mastroianni (hereinafter "Mastroianni"), U.S. Patent Nos. 6,375,403, 6,071,059, and 5,772,386 to Mages et al. (hereinafter "Mages"), PCT Application No. WO 00/33376 to Ishikawa (hereinafter "Ishikawa"), U.S. Patent No. 6,138,721 to Bonora et al. (hereinafter "Bonora"), and SEMI E57-0299.

Claims 1-17 are currently pending and presented for reconsideration. In view of the following remarks, reconsideration and withdrawal of all grounds of rejection are respectfully requested.

Claims 1-17 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Gordon in view of Mastroianni, Mages, Ishikawa, Bonora, and SEMI E57-0299. Applicants respectfully traverse this rejection in view of the following remarks.

Applicants respectfully submit that neither Gordon, Mastroianni, Mages, Ishikawa, Bonora, nor SEMI E57-0299 teach, at least, a device having a work volume for a door opening mechanism, wherein the volume has a height, width, and depth, and the depth does not exceed 80 mm from a seal plane, as recited in independent claim 1. None of the prior art references discloses the claimed work volume and a door opening mechanism that can operate within the claimed work volume. Conventional prior art door opening mechanisms require a larger work volume depth. Should Applicants be in error, as to the teachings of these references, Applicants respectfully request citation to the relevant disclosure in the references.

Applicants further submit that neither Gordon, Mastroianni, Mages, Ishikawa, Bonora, nor SEMI E57-0299 teach, at least, a seismic anchoring device disposed through an underside of a kinematic shelf, as recited in independent claim 16. The claimed seismic anchor is in addition to the kinematic pins and is used to lock the pod door opener into position after the opener is positioned on the pins. See Applicants' disclosure at page 13, paragraph 38.

As such, neither Gordon, Mastroianni, Mages, Ishikawa, Bonora, nor SEMI E57-0299, alone or in proper combination, teaches or suggests each and every element of Applicants' independent claims 1 and 16 and, therefore, dependent claims 2-15 and 17, as well. Accordingly,

Applicants respectfully request reconsideration and withdrawal of the rejection of claims 1-17 under 35 U.S.C. § 103(a).

CONCLUSION

In view of all of the foregoing reasons, Applicants respectfully request reconsideration, withdrawal of all grounds of rejection and objection, and allowance of claims 1-17 in due course. The Examiner is invited to contact Applicants' undersigned representative by telephone at the number listed below to discuss any outstanding issues.

Respectfully submitted,

Date: July 14, 2003
